

I am writing to ask you to reject the NAB petition 04-160 which seeks to limit the ability of XM Satellite Radio to provide local weather and traffic info 24 hours a day. This information is valuable during the driving time in the SF Bay Area and is far superior to that obtainable on AM radio. XM is a pay radio service and I do not believe that the FCC should limit the content that is provide in this fee-based service as long it is neither seditious nor obscene, which clearly weather and traffic is not. Thank you for your consideration.
